## Conclusion

The Ozone Analyzer BMT 965 C has been tested according to selected parts of the below listed standards. The test results are given in the FORCE Technology test report listed above. The tests were carried out as specified, and the test criteria for environmental tests, as specified in Appendix 2 of the above-mentioned test report, were fulfilled.

- USCG 46 CFR 162.060-30: "Testing requirements for ballast water management system (BWMS) components".
- IACS E10: Rev. 6, Oct: 2014. "Test Specification for Type Approval".
- IMO Resolution MEPC.279(70):2016: "Guidelines for approval of ballast water management systems (G8)" – "Part 3 – Specification for environmental testing for approval of ballast water management systems".
