

NRTL Certification - cTUVus

cTUVus (Canada & U.S)

TUV Rheinland of North America is a Nationally Recognized Testing Laboratory (NRTL) in the United States and is accredited by the Standards Council of Canada to test and certify products to Canadian National Standards. Clients can demonstrate compliance for both U.S. and Canadian markets through a single mark (cTUVus) on their product(s) which denotes compliance to U.S. and Canadian National Standards.

Key Points of cTUVus Certification

- The cTUVus mark is accredited by OSHA (NRTL) for the US and SCC for Canada.
- The cTUVus mark is recognized as the equivalent and direct replacement to the UL and CSA marks by city, county and state/provincial regulators throughout the US and Canada.
- Safety testing conducted to applicable US and Canadian standards and in most cases can be combined with testing for other global certifications.
